Size PDF version: 1822 kb

Size ePUB version: 1185 kb

Size FB2 version: 1252 kb

Other formats: mobi rtf lrf azw

This book examines the ethical controversies that have surrounded the design and conduct of international medical research sponsored by industrialized countries or industry, and carried out in developing countries. Is it acceptable to lower the ethical standards adopted in the industrialized world when carrying out research in developing, or resource-poor, countries? Ruth Macklin concludes that double standards in medical research are ethically unacceptable.
